DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-18 and 44-46, drawn to a monolayer construction, classified in class 428, subclass 338.
 - II. Claims 19-34, 39-41, and 47-49 drawn to an electronic junction, classified in class 428, subclass 411.1.
 - III. Claims 35-38, drawn to a pixel array, classified in class 349, subclass 1+.
 - IV. Claim 42, drawn to a memory device, classified in class 360, subclass 137.
 - V. Claim 43, drawn to a field emitter, classified in class 257, subclass 9+.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II-V (i.e. I and II, I and III, etc.) are related as subcombination and combination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the roughness of the substrate in Groups II-V can be greater than the average length of the molecular units. The subcombination has separate utility such as an field emitter for the combinations of Groups II-IV and a pixel array for the combination of Group V.

Art Unit: 1773

3. The inventions of Groups II-V are unrelated to each other. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the inventions are not disclosed as capable of use together and have different modes of operation, functions, and effects since the invention of Group II is an electronic junction, that of Group III is a pixel array, that of Group IV is a memory device, and that of Group V is a field emitter.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ramsey Zacharia whose telephone number is (703) 305-0503. The examiner can normally be reached on Monday through Friday from 9 to 5.
